Application/Control Number: 10/635,572

Art Unit: 2655

In response to applicant's pre-amendment dated July 16, 2004. The following action is taken:

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 5, and 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Okumura et al (6584050).

The independent claims merely read on an optical disk having marked (pits) and unmarked (mirror area) on the disk wherein the minimum pit or mirror area having a minimum length of shorter than 3T. The reference shows an optical disk having a minimum mark length of 2T as shown in fig 3a-3d meeting the claimed invention. The reference also shows the use of a photo detection means 3, an RF signal reading means 4, clock (sync) signal extracting means 6 and 7 and a demodulator (inherently present).

With respect to the limitation of claims 2, 3, 7 and 9. The reference shows the use of a minimum mark length of 2T.

With respect to the limitation of claim 5. the use of a reference signal RF signal and demodulator within the optical disk processing means is well established in the art as shown and acknowledged by applicant's own prior art.

Application/Control Number: 10/635,572

Art Unit: 2655

Page 3

Claims 6 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the cited prior art shows the use of a comparator to compare a read signal with two reference voltage levels and a selector to select one of the binary signals as claimed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 11-7668.

Any inquiry concerning this communication should be directed to NABIL Z HINDI at telephone number (703) 308-1555.
